

## Fire Suppression Systems by Pro1 Race Parts

### -Things you need to know-

Your fire suppression kit will come with instructions. Please read these instructions before installing. If you are unsure on how to fit your system please use a competent person to complete the task.

Your system will need to be serviced every 2 years at a cost of approx. \$200 plus postage fees. Please contact our office re this service.

If your bottle needs to be recharged we can do this for approx.. \$200 plus postage fees. Please contact our office re this service.

We can supply new bottles, however it would have to meet the system you have and your system must meet any new standards.

The bottle has a lifespan of 10 years. Depending on if there has been new standards introduced will determine if its just bottle change or a new / upgraded system.
